

Description:

Mapetrol Dry Chain Lube is semi-synthetic, highly adhesive lubricant, enriched with specialized additives designed to prevent aging, corrosion, and wear. Its substantial PTFE solids content guarantees a clean, grease-free seal across the entire surface. Suitable for a variety of applications including Chains, sliding surfaces, splines, cardan and universal joints, spindles, guides and gears.

Benefits:

- Superior friction reduction with special additives
- Exceptional adhesion, no dripping or shearing
- Outstanding penetration abilities
- Forms a dry, wax-like film, preventing dirt accumulation
- Water-repellent for corrosion protection
- Exceptional cushioning properties
- Highly UV-resistant

Instructions:

- Shake the can thoroughly before using it
- Ensure the surface is dry, dust-free, and grease-free
- Apply a thin coat
- Let it sit briefly
- After about two minutes, apply another thin coat
- Allow it to dry completely before putting any load on it
